CUSTOMER SATISFACTION DRIVES GROWTH AT PROSTEEL & MANUFACTURING

ProSteel & Manufacturing, Inc., a division of ProEnergy Services in Sedalia, MO, announced the addition of a second shift to increase production. ProSteel has more than doubled its number of employees over the past year, and the second shift will increase its operational capacity even further.

“ProSteel is proud to continuously be a part of ProEnergy’s exciting growth,” said John Spilker, Director of ProSteel & Manufacturing, Inc. “This expansion is possible and a confirmation of ProSteel’s relentless pursuit to delight provide our customers with exceptional quality and on time delivery.”

ProSteel manufactures, retrofits, installs and tests a variety of steel products in its 60,000 square-foot facility located on the ProEnergy campus in Sedalia. ProSteel materials are used in construction, operation and maintenance for industrial customers in manufacturing, food processing, fuel refining, material handling, water treatment, power generation, and chemical/petroleum refining processes.

ProEnergy is an integrated service provider that delivers safe, reliable solutions to industrial and energy clients throughout the world and close to home. The company has U.S. offices in Sedalia, MO; Houston, TX; and Tulsa, OK and overseas locations in Argentina, Mexico, Venezuela, Brazil, Pakistan, Panama and Ghana. More information can be found at www.prosteelfabrication.com and www.proenergyservices.com.
